Protected fuels under softwood canopy and deep duff layers continue to smolder and creep over northern parts of the fire. Effects of long term drought remain despite recent precipitation and cooler temperatures. Drought Codes remain in the Very High range and mop-up of persistent deep burning fuels is required by incident personnel. The remaining crews continued to bone pile and secure the line around the Whitestone community and in areas to the north and west in order to secure the northern most sections of the fire.
